

QUALITY CONTROL ASSOCIATE

Do you want to contribute to a future in which people get back perspective after sustaining neurological trauma? Neuroplast is looking for a Quality Control Associate to support development and ensure the quality of our advanced therapy medicinal product (ATMP).

The job

As a Quality Control Associate you will become a critical part of our dynamic and internationally active biotech company in the field of regenerative medicine. Within quality control, you contribute to ensuring the quality of our cell therapy product is determined compliant to our procedures that meet international quality requirements standards and applicable guidelines (e.g. EMA, ICH). Utilizing your skills you will plan, execute, analyse and document quality control activities. These include flow cytometry, hemocytometry, sterility testing and cell culture assays, of a human cell based medicinal product (ATMP) under GMP which is being used in a Phase II clinical trial. Furthermore, you will be involved in projects aiming at improving existing or implementing new quality control processes and analytical methods under GMP regulations to prepare QC for next (clinical) phases.

Favored skills:

- You have a Bachelor/Master of Science in Cell Biology, biotechnology, microbiology or equivalent
- Hands-on laboratory experience and managing lab tasks, a pro if a GMP environment
- A proficiency in techniques including flow cytometry, cell culture assays, qPCR and/or microbiological/sterility testing is welcome
- You are a strong communicator and are fluent in English
- You are accurate, precise and have a keen eye to spot details
- You contribute actively to solve problems using your analytical as well as your creative skills
- You are a team player and enjoy working towards a common goal together, also if this (occasionally) means working with your colleagues outside of traditional office hours

The organization

Neuroplast is a diverse, fast growing, clinical stage stem cell technology company. Neuroplast develops autologous stem cell treatments to improve and extend the lives of people who suffer from trauma induced or primarily inflammation-driven neurological disorders. Neuroplast is currently focusing its development efforts on perfecting a treatment for acute traumatic spinal cord injury patients. Neuroplast has offices in Geleen, at the Brightlands Chemelot Campus, and at the Slepeweg in Maastricht, the Netherlands.

Neuroplast is a diverse organization, currently employing people of different nationalities. We foster an organization with an open and transparent culture. We believe this encourages conversation to share a multitude of perspectives, thoughts and opinions thereby prospering advancements by working as a team.
