

## PROJECT MANAGER

**Do you want to contribute to a future in which people get back perspective after sustaining neurological trauma? Neuroplast is looking for a project manager to keep our ambitious development program on track. As a project manager you are responsible for initiating, coordinating, and evaluating a variety of projects, ranging from international business development to product research and process improvement related projects.**

### **The job**

You'll perform a pivotal role within Neuroplast to ensure our ambitious development program is kept on track. In doing so, you keep the executive management team informed, uphold project milestones and targets and keep all stakeholders abreast of relevant developments. You'll make sure project activities are well defined, progress is monitored, and planning and scheduling adequately reflects operational capacity and business prioritization. You'll take the lead in evaluating past projects, to identify improvement potential and ensure the organization keeps evolving.

### **Our perfect match**

- You have relevant experience in initiating, coordinating, and evaluating projects
- You are aware of project management methodologies and practices
- You are a strong communicator and are fluent in English and at least one other Western European language
- You are a self-starter with a pro-active attitude who thrives in a dynamic environment
- You have experience in the Life Sciences Industry
- You can keep the big picture in mind and can easily distinguish between main and side issues
- You use your skills and leadership competencies for prioritization, planning, scheduling, risk identification, problem solving, and task delegation
- You ensure all relevant stakeholders are adequately informed at all times
- When decisions have to be made, you ensure the context, the available options and the associated risks and impact are well understood

### **The organization**

Neuroplast is a diverse, fast growing, clinical stage stem cell technology company. Neuroplast develops autologous stem cell treatments to improve and extend the lives of people who suffer from trauma induced or primarily inflammation-driven neurological disorders. Neuroplast is currently focusing its development efforts on perfecting a treatment for acute traumatic spinal cord injury patients. Neuroplast has offices in Geleen, at the Brightlands Chemelot Campus, and at the Slepeweg in Maastricht, the Netherlands.

Neuroplast is a diverse organization, currently employing people from ten different nationalities. We pride ourselves on being an organization with an open and transparent culture. Encouraging conversation, and welcoming a multitude of perspectives, thoughts and opinions.
