

## BIOTECH ASSOCIATE

**Do you want to contribute to a future in which people get back perspective after sustaining neurological trauma? Neuroplast is looking for a Biotech Associate to carry out manufacturing activities for its advanced therapy medicinal product.**

### The job

As a Biotech Associate you will work closely together with your colleagues in our manufacturing team. With your familiarity to GMP standards and previous experience with general laboratory activities in the field of cell-based products such as cell- and tissue culturing, you'll quickly complete the in-house training. Subsequently you'll take on responsibilities for the full production cycle, by carrying out aseptic manufacturing procedures of a cell based human medicinal product in a cleanroom environment. You'll further be involved in product, media & toolbox preparation, as well as assisting with shipping and logistics activities. You'll contribute to our continued GMP compliance by filling out batch records, writing reports, and generating and revising Standard Operating Procedures.

### Our perfect match

- You have a Bachelor of Science in cell biology/ biotechnology or equivalent
- You have worked more than 2-years in industry laboratories with sterile working techniques, on cell- or tissue culturing in a GMP environment (Lab is a hard requirement)
- You are a strong communicator and are fluent in English and at least one other Western European language
- You are accurate, work in a tidy manner, and contribute actively to solve problems
- You enjoy working towards a common goal, also if this (occasionally) means working with your colleagues to get things done outside of traditional office hours
- You are willing to assist in international company activities, mostly related to international clinical trials.

### The organization

Neuroplast is a diverse, fast growing, clinical stage stem cell technology company. Neuroplast develops autologous stem cell treatments to improve and extend the lives of people who suffer from trauma induced or primarily inflammation-driven neurological disorders. Neuroplast is currently focusing its development efforts on perfecting a treatment for acute traumatic spinal cord injury patients. Neuroplast has offices in Geleen, at the Brightlands Chemelot Campus, and at the Slepeweg in Maastricht, the Netherlands.

Neuroplast is a diverse organization, currently employing people from ten different nationalities. We pride ourselves on being an organization with an open and transparent culture. Encouraging conversation, and welcoming a multitude of perspectives, thoughts and opinions.
