

QUALITY ASSURANCE OFFICER

Do you want to contribute to a future in which people get back perspective after sustaining neurological trauma? Neuroplast is looking for a Quality Assurance Officer to support development and ensure the quality of our advanced therapy medicinal product.

The job

The Quality Assurance Officer will be responsible for planning and execution of daily quality assurance activities while ensuring compliance with international quality requirements as defined by the applicable guidelines (e.g., FDA, EMA, ICH) and all existing GMP standards in the area of responsibility. You will be a critical part of a dynamic international biotech company in the field of regenerative medicine.

Essential duties:

- Plan and execute quality assurance activities (document management, batch records and label issuance, batch record review, equipment, and supplier qualifications etc.) including documentation.
- Monitor compliance with all applicable GMP and safety standards.
- Write, review, and approve documentation (SOP's, manufacturing and quality instructions, validation of protocols and reports, non-conformities, change requests). Handle, distribute and archive controlled documents.
- Prepare data for performance monitoring, trending, statistical data analysis and support internal and external audits.
- Support the implementation of a digital Quality Management System together with the team.

Our perfect match:

- Minimum of a bachelor's degree in Pharmacy/biotechnology related course.
- 2 - 5 years of experience GMP required, and preferable experienced with cellular products (ATMP).
- Experience in Quality Assurance is desirable.
- Fluent in English language (verbal and written).
- Accurate, proactive, self-organized, flexible, attention to detail, team player.
- Demonstrates general knowledge of quality standards, methodologies and systems, and ISO standards.
- Proven ability to effectively participate in multi-disciplinary teams.
- Good understanding of European regulation (ATMP).
- You enjoy working towards a common goal, also if this (occasionally) means working with your colleagues to get things done outside of traditional office hours.

The organization

Neuroplast is a diverse, fast growing, clinical stage stem cell technology company. Neuroplast develops autologous stem cell treatments to improve and extend the lives of people who suffer from trauma induced or primarily inflammation-driven neurological disorders. Neuroplast is currently focusing its development efforts on perfecting a treatment for acute traumatic spinal cord injury patients. Neuroplast has offices in Geleen, at the Brightlands Chemelot Campus, and at the Slepeweg in Maastricht, the Netherlands.

Neuroplast is a diverse organization, currently employing people from eleven different nationalities. We pride ourselves on being an organization with an open and transparent culture. Encouraging conversation, and welcoming a multitude of perspectives, thoughts and opinions.
